Course Outline 2018  
ECON 343: EAST ASIAN GROWTH AND TRADE (15 POINTS)  
Semester 2 (1185)

Course prescription
A study of the economic factors underlying the dynamic trade and growth performance of the major economies of contemporary East Asian region, and of the impact of their development on New Zealand's international trading environment. Study of individual East Asian economies is strongly emphasised.

Course advice
Prerequisite: ECON 201 Microeconomics or ECON 232 (Development of the International Economy) or ECON 241 International Economics

Complementary courses: Students will also find it useful to have completed ECON 211 Macroeconomics, and will find that ECON 343 combines well with study of ECON 341 International Trade and/or ECON 352 International Finance.

Goals of the course
East Asia continues to be one of the most economically dynamic regions in the world economy, and remains central to New Zealand's economic and trading future. A number of key economies in East Asia have been undergoing profound economic, and in some cases political, transitions, while important developments have been taking place in the evolution of the trade arrangements involving East Asian economies and their relations with economies outside the East Asian region, including New Zealand. The region and its trading relationships now also face the challenges of responding to the potentially far-reaching disturbances currently occurring in the international trading system. Given the increasingly extensive business linkages between New Zealand and East Asia, and the significance of developments in major East Asian economies for the global and regional economies, understanding of developments in the East Asian economies and their potential responses to changes in the international trading environment is increasingly important for the New Zealand businessmen and businesswomen of the future.

The purpose of this course is to provide students with an understanding of the distinctive features and key current developments in the major East Asian economies including China, Japan, and Korea as well as ASEAN and selected Southeast Asian economies. It will also survey major economic issues and lessons to be drawn from East Asia’s economic
development, as well as current concerns relating to the so-called “middle-income trap”, and perceptions and evidence of increasing income inequality in a number of East Asian economies. The course also aims to provide an understanding of key issues in the evolution of East Asia’s trading relationships, including the spread of production networks, the current proposal for a Regional Comprehensive Economic Partnership (RCEP), the issues relating to the Trans-Pacific Partnership (TPP) and its successor, the Comprehensive and Progressive Trans-Pacific Partnership (CPTPP), the state of play regarding the proposal for a Free Trade Area of the Asia Pacific (FTAAP), and how key East Asian economies are being impacted by and responding to the trade disturbances emanating from outside the region. Attention will be given to the increasing economic influence of China in the region and the world at large, including through its Belt and Road Initiative (BRI).

### Learning outcomes (LO)

<table>
<thead>
<tr>
<th>#</th>
<th>Learning outcome</th>
<th>Graduate profile capability*</th>
</tr>
</thead>
<tbody>
<tr>
<td>LO1</td>
<td>Understand the salient economic features of each major phase in the recent economic development of East Asia, and the relevant economic analysis applicable to each phase.</td>
<td>2. Critical thinking</td>
</tr>
<tr>
<td>LO2</td>
<td>Familiarity with the economic background and analysis relevant to selected key policy issues and developments in East Asian economies, including issues related to the so-called “middle-income trap”, perceptions of rising income inequality in some East Asian economies, the evolution of East Asian production networks, and the growing economic importance of China in the region and in the world economy.</td>
<td>2. Critical thinking</td>
</tr>
<tr>
<td>LO3</td>
<td>Familiarity with the main distinctive features of the evolving economic structures and development of China, Japan, Korea, and selected Southeast Asian economies, and relevant economic analysis applicable to the main economic issues currently faced by these economies.</td>
<td>1. Disciplinary knowledge and practice</td>
</tr>

Note: The above schedule is indicative; some topics may take more or less time. The lecture schedule may also need to be varied slightly for other reasons, for example to allow for guest lectures. Lectures will be recorded.

**Learning and teaching**

Lectures, tutorials, and the readings designated for tutorial and assignment topics are all essential to achieving the learning outcomes of the course. Students should be aware that readings comprise a significant part of the learning process for this course.

Lectures are scheduled as follows:

Wednesday 8.00am-10am Old Choral Hall 1 (104-G53)
Friday 8.00am-10am, BLT204 Biology Building (106-204)

Lectures will normally be of 90 minutes duration, but occasionally it will be necessary to use the full 2 hours, and students are accordingly advised to ensure that they are free to attend for the full 2 hours when necessary.

Visiting lecturers with first-hand experience of the economies being studied will be introduced as the opportunity arises. Some minor changes to the lecture programme may be needed to accommodate this.

Videos will be shown occasionally, where useful in reinforcing material covered in lectures.
Tutorials are an essential part of the course and coursework, and are compulsory, with tutorial participation counting for 10% of the overall assessment for the course (see below). Each student will be expected to take part in one group presentation at a tutorial during the semester, based on an assigned topic and relevant reading references provided. Marks for tutorial participation are based on a combination of performance in that presentation, overall participation in tutorial discussions over the semester, and attendance. A policy covering allowance for unavoidable absence from tutorials will be circulated at the beginning of the semester.

Tutorials are scheduled as follows:

Wednesday 11.00am-12 noon OGGB Room 317
Wednesday 12 noon to 1.00pm - OGGB Room 317
Friday 12 noon to 1.00pm - OGGB Room 317
Friday, 1.00pm to 2.00pm - OGGB Room 217

Each student will be enrolled in one of these tutorials and will be expected to attend that tutorial except where special arrangements have been made with the tutor.

Teaching staff

Course Director and Lecturer:
Associate Professor Rob Scollay
653 Owen G Glenn Building; 923 6910
r.scollay@auckland.ac.nz

Tutor:  James Rankin
Contact details to be advised

Office Hours

There will be set lecturer office hours each week. These will be announced at the beginning of the semester as well as via Canvas.

Tutor office hours will be held prior to the test and the due date for the assignment times will be advised via lectures and via Canvas.

Learning resources

There is no set textbook for this course. Detailed slides will be provided to accompany each lecture. There will be a set of readings for each tutorial topic and more extensive readings for assignment topics. Additional suggested references will also occasionally provided in lectures. Availability will be indicated for each reference. In the majority of cases references will be available from the General Library in electronic form and in some cases in hard copy form as well. Wherever possible electronic copies will be provided via CANVAS.

</table>
Pass requirements
Plussage does not apply.
A pass normally requires a combined score of 50% across all assessment tasks. There is no minimum score required for individual assessment tasks.
Students with valid reasons for missing the test should contact the lecturer as early as possible with a view to determining possible alternative arrangements.
Late assignments will be accepted without penalty only where extensions have been sought and granted, based on an acceptable reason being provided. In other cases, late assignments will be accepted but will incur a penalty of 10% per day of the mark otherwise awarded.

Inclusive learning
Students are urged to discuss privately any impairment-related requirements face-to-face and/or in written form with the courses convenor/lecturer and/or tutor.

Academic integrity
The University of Auckland will not tolerate cheating, or assisting others to cheat, and views cheating in coursework as a serious academic offence. The work that a student submits for grading must be the student’s own work, reflecting his or her learning. Where work from other sources is used, it must be properly acknowledged and referenced. This requirement also applies to sources on the worldwide web. A student’s assessed work may be reviewed against electronic source material using computerised detection to provide an electronic version of their work for computerised review.

Student feedback
Student feedback is encouraged in this course. During the semester, students may directly submit their feedback to the lecturer through a face-to-face appointment, or they may wish to submit feedback through the class representative.

Class Representatives
At the beginning of each semester, you will select one or more class representatives for the paper. The role of the class representative is to gather feedback from students in the course and bring this to the lecturer and/or the Department. Class representatives’ email addresses are posted on Canvas and you are encouraged to contact them with feedback relating to the course. You are also welcome to talk to the class representatives in person.
Staff-Student Consultative Committee
Class representatives also submit feedback to the Department of Economics Staff Student Consultative Committee (SSCC), which meets up to three times per semester to gain feedback regarding the course. Only class representatives may attend the SSCC meetings, and they will ask the class for feedback before the SSCC meeting.

Course and teaching evaluations
At the end of the semester, you will have the opportunity to submit an evaluation of the course in a formative feedback questionnaire. We strongly encourage you to take part in this evaluation process.

In the event of an unexpected disruption
We undertake to maintain the continuity and standard of teaching and learning in all your courses throughout the year. If there are unexpected disruptions, the University has contingency plans to ensure that access to your course continues and your assessment is fair, and not compromised. Some adjustments may need to be made in emergencies. In the event of a disruption, the University and your course coordinators will make every effort to provide you with up to date information via Canvas and the University website.

Graduate profile for BCom (Economics)
The following six themes represent the capabilities that the Business School seeks to foster in all of its graduates. The development of these capabilities does not come all at once, but rather is expected to build from year to year. Each course is not expected to contribute to all capabilities, but each course will have its own goals and learning outcomes that relate to the overall development of this profile.

1) DISCIPLINARY KNOWLEDGE AND PRACTICE - Graduates will be able to demonstrate and apply a breadth of knowledge across disciplines, as well as specialist knowledge within one or more of them, while recognising the relevancy of this knowledge within a global context
   Disciplinary knowledge and practice
2) CRITICAL THINKING - Graduates will be able to analyse and critique theory and practice to develop well-reasoned arguments
   Critical thinking
3) SOLUTION SEEKING - Graduates will be able to identify and frame problems using analytical skills to create and evaluate innovative solutions.
   Solution seeking
   Quantitative reasoning
4) COMMUNICATION AND ENGAGEMENT - Graduates will be able to collaborate and communicate effectively in diverse business contexts using multiple formats.
   Oral communication
   Written communication
   Engagement
5) INDEPENDENCE AND INTEGRITY - Graduates will be able to respond professionally and ethically, demonstrating a capacity for independent thought and learning.

   Independence
   Integrity

6) SOCIAL AND ENVIRONMENTAL RESPONSIBILITIES - Graduates will recognise the significance of the principles underpinning the Treaty of Waitangi and consider their obligations in relation to sustainability, whilst displaying constructive approaches to diversity.

   Social responsibility
   Environmental responsibilities
